 **CIPOA**
6TH | BRAZIL

**Iberoamerican Conference on
Advanced Oxidation Technologies**

The **VI Iberoamerican Conference on Advanced Oxidation Technologies (CIPOA)** is scheduled to take place from October 7 to October 11, 2024, in the beautiful city of Florianópolis, Brazil. Registration and abstract submissions remain open until March 15th, 2024 through the event's official website: www.cipoa.org.

CIPOA's primary mission is to provide a platform for in-depth discussions and exploration of advancements in Advanced Oxidation Processes. This will be achieved through a variety of channels, including conferences, technical lectures, coordinated sessions, roundtable discussions, workshops, and the presentation of research through both oral and poster formats.

The conference will feature presentations from esteemed national and international speakers and experts. CIPOA's thematic focus encompasses sustainable applications of Advanced Oxidation Technologies (AOTs), including clean energy development (solar), advanced treatment methods for water and liquid effluents (such as ozonation, cold plasma, photocatalytic materials, UV, peroxidation, catalytic oxidation, and more), air and soil decontamination, renewable fuels, green hydrogen, and applications within diverse industries like textiles, food, and construction materials, among others.

This event marks a return to Brazil after the previous edition was held in Peru in 2022.
